Pablo Ezequiel Harrod

Full-Stack Software Engineer

San Miguel de Tucumán, Argentina|+54 9 3816240708|harrod.pablo@gmail.com

LinkedIn: linkedin.com/in/ pablo- ezequiel-harrod-b172423ab

Github: github.com/HarrodPablo

Porfolio: portfolio-pabloharrod.vercel.app

Full-Stack Software Engineer with a solid track record in designing, architecting, and deploying scalable applications using the JavaScript/React and Node.js ecosystem. Specialized in scalable architectures (Next.js, Express), relational databases (PostgreSQL, Prisma), and performance optimization. Focused on delivering end-to-end products, from database conception to cloud deployment, applying best practices and modern engineering tools.

Technical Skills

Frontend

- React.js
- Vite
- Next.js
- Tailwind CSS
- Zustand
- React Query
- Framer Motion

Cloud & Auth

- Vercel
- Cloudinary
- JWT
- OAuth 2.0
- APIs RESTful

Backend & DB

- Node.js
- Express
- PostgreSQL (Neon)
- Prisma ORM
- MongoDB

IA & Cloud Engineering

- Integración de LLMs y Agentes IA (Gemini, Ollama)
- Despliegue y APIs Cloud (Google Cloud)
- Desarrollo Asistido por IA (Cursor, Continue, Antigravity IDE)

Mobile & Herramientas

- Capacitor
- Git/GitHub
- Docker
- Postman
- Nginx
- VPS (Linux)

Professional Experience

Software Engineer | Independent Consultant & Freelance 2024 - Present

- **Healthcare IT Systems Architecture**: Engineered and developed an end-to-end, scalable Radiology Portal. Implemented strict Role-Based Access Control (RBAC) and integrated a native DICOM viewer with a PACS server (Orthanc) utilizing Node.js reverse proxies. Ensured clinical data security and successfully deployed the infrastructure on a Linux VPS (Ubuntu, Nginx, Docker).

- **E-commerce & SaaS Management Systems**: Designed and deployed B2B/ B2C transactional platforms (React, Node.js, PostgreSQL). Built administrative dashboards (CRM) featuring batch stock control, executed scheduled cron jobs for automated inventory alerts, and optimized cloud media management via Cloudinary.

- **Mobile & Serverless Applications**: Developed offline-first mobile applications using Capacitor and Zustand (IndexedDB) for seamless on-device processing. Architected serverless platforms (Next.js) with complex third-party integrations, including Google Workspace APIs (Sheets, Gmail SMTP), and transactional databases on Neon DB.

Frontend Engineer | Ikigai Technology 2023 - Present

● **Technical Leadership**: Spearheaded the migration and frontend architecture of the main corporate platform into a high-performance Single Page Application (SPA) using React 18 and Tailwind CSS.

● **UI/UX Optimization**: Developed a proprietary Design System and modular components that significantly reduced initial load times and increased user retention through fluid routing and native dark mode support.

Education & Certifications

● **Associate Degree in Software Engineering** - Universidad Tecnológica Nacional (UTN TUC) | 2021 - 2023

● **Full Stack Specialization** - Rolling Code School | 2024

● **Cloud & Serverless Architectures Specialization** - Udemy | 2025

● **Prompt Engineering & Generative AI for Developers** - DeepLearning.AI (Coursera) | 2025

● **Languages**: English (B2 - Technical and Conversational), Spanish (Native)
